INFORMATION SCIENCES

AN INTERNATIONAL JOURNAL

Volume Contents for 2001

Volume 131, Numbers 1–4, January 2001

D.L. Hung, K. Hillesland and J. Wang
Architecture and design of a hardware accelerator for efficient 3D object recognition using the LC method 1

M. Al-mulhem and M. Ather
MRG parser for visual languages 19

J.-C. Lin and P.-L. Yeh
Automatic test data generation for path testing using GAs 47

J.K. Kishore, L.M. Patnaik, V. Mani and V.K. Agrawal
Genetic programming based pattern classification with feature space partitioning 65

A.C. Osseiran
Qualitative Bayesian networks 87

J.-J. Sheu, J.J.M. Tan and L.-H. Hsu
Routing properties of supercubes 107

J.W. Guan, D.A. Bell and Z. Guan
Matrix computation for information systems 129

G. Resconi and I.B. Türksen
Canonical forms of fuzzy truthoods by meta-theory based upon modal logic 157

D. Bamber, I.R. Goodman and H.T. Nguyen
Extension of the concept of propositional deduction from classical logic to probability: an overview of probability-selection approaches 195

Volume 132, Numbers 1–4, February 2001

M. Rajopadhye, M.B. Ghalia, P.P. Wang, T. Baker and C.V. Eister
Forecasting uncertain hotel room demand 1

PII: S0020-0255(01)00199-2

F.Y. SHIH AND A.J. KOWALSKI
Computing unique three-dimensional object aspects representation . . 13

Y. SHANG, L. LI AND B. WAH
Optimization design of biorthogonal filter banks for image compression 23

R. LAO, O.V. FAVOROV AND J.P. LU
Nonlinear dynamical properties of a somatosensory cortical model . . . 53

B. ROCHE, T.M. MC GINNITY, L.P. MAGUIRE AND L.J. MC DAID
Signalling techniques and their effect on neural network implementation sizes 67

V.A. NISKANEN
Prospects for soft statistical computing: describing data and inferring from data with words in the Human Sciences 83

P. LOSLEVER
Obtaining information from time data statistical analysis in human component system studies. I: Methods and performances 133

P. LOSLEVER
Obtaining information from time data statistical analysis in human component system studies. II: Example with simulated data 157

R.K. DE AND S.K. PAL
A connectionist model for selection of cases 179

N.N. KARNIK AND J.M. MENDEL
Centroid of a type-2 fuzzy set 195

Y. XU, D. RUAN, E.E. KERRE AND J. LIU
α-Resolution principle based on first-order lattice-valued logic $LF(X)$ 221

S.P. JENA, S.K. GHOSH AND B.K. TRIPATHY
On the theory of bags and lists 241

Volume 133, Numbers 1–2, March 2001

Special Issue: Fuzzy random variables
Guest editor: Maria Angeles Gil

M.A. GIL
Fuzzy random variables 1

A. COLUBI, J. SANTOS DOMÍNGUEZ-MENCHERO, M. LÓPEZ-DÍAZ AND D.A. RALESCU
On the formalization of fuzzy random variables 3

S. LI, Y. OGURA AND H.T. NGUYEN
Gaussian processes and martingales for fuzzy valued random variables with continuous parameter 7

H. INOUE
Exchangeability and convergence for random sets 23
P. TERÁN AND M. LÓPEZ-DÍAZ
On Bernstein approximants and the φ-variation of a fuzzy random variable 39
W. NÄTHER
Random fuzzy variables of second order and applications to statistical inference 69
M. MONTENEGRO, M.R. CASALS, M.A. LUBIANO AND M.A. GIL
Two-sample hypothesis tests of means of a fuzzy random ariable 89

Volume 133, Numbers 3–4, April 2001

Special Issue: Evolutionary algorithms
Guest editor: Manuel Graña

M. GRAÑA
Evolutionary algorithms 101
B. OLSSON
Co-evolutionary search in asymmetric spaces 103
J. SANTOS, R.J. DURO, J.A. BECERRA, J.L. CRESPO AND F. BELLAS
Considerations in the application of evolution to the generation of robot controllers 127
J.C. OH
Promoting cooperation using 'kin' biased conditional strategy in the iterated prisoner's dilemma game 149
H. TIMUCIN OZDEMIR AND C.K. MOHAN
Flight graph based genetic algorithm for crew scheduling in airlines 165
Y.S. YEUN, K.H. LEE, S.M. HAN AND Y.S. YANG
Smooth fitting with a method for determining the regularization parameter under the genetic programming algorithm 175
H. FRÖHLICH, A. KOŠIR AND B. ZAJC
Optimization of FPGA configurations using parallel genetic algorithm 195
A.F. SHETA AND K. DE JONG
Time-series forecasting using GA-tuned radial basis functions 221
S. TSUTSUI AND D.E. GOLDBERG
Search space boundary extension method in real-coded genetic algorithms 229

A.I. González, M. Graña, J. Ruiz Cabello, A. D'Anjou and F.X. Albizuri
Experimental results of an evolution-based adaptation strategy for VQ image filtering 249
A.L. Buczak, H. Wang, H. Darabi and M.A. Jafari
Genetic algorithm convergence study for sensor network optimization 267

Volume 134, Numbers 1–4, May 2001

Special Issue: Computing with Words

P. Walley and G. de Cooman
A behavioral model for linguistic uncertainty 1
J. Kortelainen
Applying modifiers to knowledge acquisition 39
H. Becker
Computing with words and machine learning in medical diagnostics 53
J. Kacprzyk and S. Zadrożny
Computing with words in intelligent database querying: standalone and Internet-based applications 71
C. Tseng
Control with Word: the modular approach 111
V.A. Niskanen
Prospects for integrating analysis of variance with soft computing .. 135
T. Yang
Computational verb systems: computing with perceptions of dynamics . 167

Volume 135, Numbers 1–2, June 2001

Special Issue: Dictionary Based Compression
Guest editor: Bruno Carpentieri

J. Bentley and D. Mcilroy
Data compression with long repeated strings 1
P. Ferragina and G. Manzini
An experimental study of a compressed index 13
M. Factor and D. Sheinwald
Compression in the presence of shared data 29
S. De Agostino
Parallelism and dictionary based data compression 43

Y.A. Reznik and W. Szpankowski
On the average redundancy rate of the Lempel–Ziv code with the k-error protocol 57

B. Carpentieri
Block matching displacement estimation: a sliding window approach 71

J.H. Reif and J.A. Storer
Optimal encoding of non-stationary sources 87

F. Rizzo, J.A. Storer and B. Carpentieri
LZ-based image compression 107

Volume 135, Numbers 3–4, July 2001

Special Issue: Heuristic Search and Computer Game Playing

H.H.L.M. Donkers, J.W.H.M. Uiterwijk and H.J. van den Herik
Probabilistic opponent-model search 123

J. Schaeffer, A. Plaat and A. Junghanns
Unifying single-agent and two-player search 151

K.-H. Chen
A study of decision error in selective game tree search 177

M. Müller
Global and local game tree search 187

R. Wu and D.F. Beal
Solving Chinese chess endgames by database construction 207

Volume 136, Numbers 1–4, August 2001

Special Issue: Recent Advances in Genetic Fuzzy Systems
Guest editors: O. Cordón, F. Herrera, F. Hoffmann, L. Magdalena

O. Cordón, F. Herrera, F. Hoffmann and L. Magdalena
Recent advances in genetic fuzzy systems 1

F. Hoffmann and O. Nelles
Genetic programming for model selection of TSK-fuzzy systems ... 7

M. Regattieri Delgado, F. Von Zuben and F. Gomide
Hierarchical genetic fuzzy systems 29

T. Suzuki, T. Kodama, T. Furuhashi and H. Tsutsui
Fuzzy modeling using genetic algorithms with fuzzy entropy as conciseness measure 53

I. Renners and A. Grauel
Optimizing lattice-based associative memory networks by evolutionary algorithms 69

O. Cordón, F. Herrera, L. Magdalena and P. Villar
A genetic learning process for the scaling factors, granularity and contexts of the fuzzy rule-based system data base 85

H. Ishibuchi, T. Nakashima and T. Murata
Three-objective genetics-based machine learning for linguistic rule extraction 109

J. Casillas, O. Cordón, M.J. Del Jesus and F. Herrera
Genetic feature selection in a fuzzy rule-based classification system learning process for high-dimensional problems 135

A. González and R. Pérez
An experimental study about the search mechanism in the SLAVE learning algorithm: Hill-climbing methods versus genetic algorithms . 159

L. Sánchez, I. Couso and J.A. Corrales
Combining GP operators with SA search to evolve fuzzy rule based classifiers 175

A.F. Gómez-Skarmeta, M. Valdés, F. Jiménez and J.G. Marín-Blázquez
Approximative fuzzy rules approaches for classification with hybrid-GA techniques 193

A. Bonarini and V. Trianni
Learning fuzzy classifier systems for multi-agent coordination 215

Volume 137, Numbers 1–4, September 2001

M. Cochinwala, V. Kurien, G. Lalk and D. Shasha
Efficient data reconciliation 1

S.-H. Lee, Y.-S. Moon, K.-Y. Whang and I.-Y. Song
DyBASe: A buffer allocation scheme for reducing average initial latency in video-on-demand systems 17

M.S. Obaidat, M.A. Suhail and B. Sadoun
An intelligent simulation methodology to characterize defects in materials 33

B. Sadoun
An efficient simulation scheme for testing materials in a nondestructive manner 43

T.K. Shih
Mobile agent evolution computing 53

W. Fang, F.S. Roberts and Z. Ma
A measure of discrepancy of multiple sequences 75
F. Polat, A. Cosar and R. Alhajj
Semantic information-based alternative plan generation for multiple query optimization 103
C.M. Lin and Y.J. Mon
A fuzzy-PDC-based control for robotic systems 135
J. Lu, G. Chen and H. Ying
Predictive fuzzy PID control: theory, design and simulation 157
S.D. Nikolopoulos
Optimal Gray-code labeling and recognition algorithms for hypercubes 189
S.K. Madria, S.N. Maheshwari and B. Chandra
Virtual partition algorithm in a nested transaction environment and its correctness 211
A. Kumar
An efficient algorithm for solving the partial sum query problem . . . 245
A.A. Rescigno
Vertex-disjoint spanning trees of the star network with applications to fault-tolerance and security 259
E. Savas
On statistically convergent sequences of fuzzy numbers 277
S.A. El-Sheikh
A new approach to fuzzy bitopological spaces 283
P.K. Saha and A. Rosenfeld
Local and global topology preservation in locally finite sets of tiles . . 303

Volume 138, Numbers 1–4, October 2001

A.G. Adami and D.A.C. Barone
A speaker identification system using a model of artificial neural networks for an elevator application 1
Y. Lee and B.D. Choi
Queueing system with multiple delay and loss priorities for ATM networks 7
V. Catania, G. Ficili and D. Panno
An integrated framework for traffic control in ATM networks based on soft-computing techniques 31
D.D. Sha and J.P. Sutton
Towards automated enhancement, segmentation and classification of digital brain images using networks of networks 45

B. Gu and L. Hong
Tracking 2-D rigid targets with invariant constraints 79
C.-M. Park, K.-Y. Whang, J.-J. Lee and I.-Y. Song
A cost-based buffer replacement algorithm for object-oriented database systems 99
Y. Liang, C. Zhou, Z. Wang, H.P. Lee and S.P. Lim
An equivalent genetic algorithm based on extended strings and its convergence analysis 119
J.K. Chen, Y.H. Chin and Y.F. Huang
Key factors for improving performance of concurrency control algorithms 137
E. Mäkinen, T. Poranen and P. Vuorenmaa
A genetic algorithm for determining the thickness of a graph 155
D. García, M.A. Lubiano and M.C. Alonso
Estimating the expected value of fuzzy random variables in the stratified random sampling from finite populations 165
D.H. Hong, J.-K. Song and H.Y. Do
Fuzzy least-squares linear regression analysis using shape preserving operations 185
P. Liu and H. Li
Analyses for $L_p(\mu)$-norm approximation capability of generalized Mamdani fuzzy systems 195
G. Wang and H. Wang
Non-fuzzy versions of fuzzy reasoning in classical logics 211
R.R. Yager, M. Detyniecki and B. Bouchon-Meunier
A context-dependent method for ordering fuzzy numbers using probabilities 237
K. Krithivasan and K. Sharda
Fuzzy ω-automata 257

Volume 139, Numbers 1–2, November 2001

Special Issue: Bioinformatics
Edited by: James R. Gattiker, Jason T.L. Wang, Paul P. Wang

J.R. Gattiker
Editorial: Bioinformatics 1
T. Critchlow, R. Musick and T. Slezak
Experiences applying meta-data to bioinformatics 3
M. Schroeder, D. Gilbert, J. van Helden and P. Noy
Approaches to visualisation in bioinformatics: from dendrograms to Space Explorer 19

G.D. COLLINS, S. LE AND K. ZHANG
A new algorithm for computing similarity between RNA structures . 59

K. TORKKOLA, R.M. GARDNER, T. KAYSSER-KRANICH AND C. MA
Self-organizing maps in mining gene expression data 79

A.K.C. WONG, D.K.Y. CHIU AND W. HUANG
A discrete-valued clustering algorithm with applications to biomolecular data 97

B. OLSSON, K. LAURIO AND L. GUDJONSSON
A hybrid method for protein sequence modeling with improved accuracy 113

M.M. YIN AND J.T.L. WANG
Effective hidden Markov models for detecting splicing junction sites in DNA sequences 139

Volume 139, Numbers 3–4, December 2001

Special Issue: Relational Methods in Computer Science
Guest editors: Jules Desharnais, Marc Frappier, Ali Jaoua, Wendy MacCaull

J. DESHARNAIS, M. FRAPPIER, A. JAOUA AND W. MACCAULL
Preface 165

R. BERGHAMMER AND T. HOFFMANN
Relational depth-first-search with applications 167

D. KOZEN AND J. TIURYN
On the completeness of propositional Hoare logic 187

W. KAHL
Parallel composition and decomposition of specifications 197

M. BÖTTNER
Multigrade extension of relational grammar 221

M. WINTER
A new algebraic approach to *L*-fuzzy relations convenient to study crispness 233

J. DESHARNAIS AND B. MÖLLER
Characterizing determinacy in Kleene algebras 253

J.L. PFALTZ AND R.E. JAMISON
Closure systems and their structure 275

Author index to volumes 131–139 287

Title index to volumes 131–139 295

Volume contents for 2001 299
